

Grout Deep Clean

Problem Solving Guide

BIODEGRADABLE
FORMULA

Problem: If the product problem you are experiencing is not covered by the guide then it is most likely something that is job specific. Therefore please contact Aqua Mix directly for more detailed advice and information.

Solutions: The solutions described are not necessarily the only way to solve the specific problem. However they are based on giving you the most efficient and direct solution without resorting to more complex solutions that may require a professional. If the solutions outlined do not solve the problem it is most likely job specific. Therefore please contact Aqua Mix directly for more detailed advice and information.

Note: Please read the full product label before using any product and observe the Test Area instruction noted on all labels.

Problem	Reason	Solution
Grout looks patchy after cleaning.	<ul style="list-style-type: none"> • Incomplete rinsing. • Grout not completely dry. • Could be permanent discoloration exposed after cleaning. 	<ul style="list-style-type: none"> • Rinse with clean water. • Allow to dry. • For repair of permanently discolored grout apply Aqua Mix Grout Colorant.
Residue on surface after cleaning (Most likely a white crystalline residue).	<ul style="list-style-type: none"> • Cleaner not completely removed after cleaning or lack of proper rinsing. 	<ul style="list-style-type: none"> • Rinse surface several times with clean water and use Aqua Mix NanoScrub and white pad.
Does not Clean.	<ul style="list-style-type: none"> • Not the appropriate cleaner for the intended contaminant. 	<ul style="list-style-type: none"> • Look at Aqua Mix product literature to research correct cleaner.
