

FIBERGLASS JOINT TAPE

PRICE

- **Mesh construction**
- **Perfect for reinforcing concrete backerboard joints**
- **High-strength, special polymer coating for alkali resistance**
- **Adhesive backed for fast application**

DIRECTIONS

Pre-fill gaps of all corners and joints where concrete backerboards join with latex-modified thin-set mortar. Embed and smooth tape into the bonding material, centered directly over the joints and corners, with a flat trowel. Feather edge over the seam. Custom® Building Products' thin-set mortars mixed with Thin-Set Mortar Admix are recommended.
